

PASTOR OLATUNDE

SOFTWARE DEVELOPER | QA TESTER

Atlanta, GA | pastorolatunde13@gmail.com | linkedin.com/in/peter-olatunde-8b027123b
Portfolio: pastor-olatunde.netlify.app

PROFESSIONAL SUMMARY

Software Developer and QA Tester with 3+ years of IT experience building client-facing web and workflow applications, translating requirements into working features, and validating releases through functional, regression, and user acceptance testing. Hands-on with JavaScript, React, Google Apps Script, Firebase, Google Cloud, Python, SQL, defect reproduction, and fix verification.

TECHNICAL SKILLS

Development: JavaScript, React, Python, HTML, CSS, SQL/MySQL, Google Apps Script, Git

Quality Assurance: Functional, regression and user acceptance testing, automated browser tests (Playwright), test cases, defect reporting, issue reproduction, fix verification

Cloud & Platforms: Firebase, Google Cloud, Google Sheets, Google Drive, AWS fundamentals, Windows, macOS, Linux

Support & Security: Troubleshooting, endpoint configuration, IAM, MFA, SSO, Nmap, Wireshark, vulnerability scanning

PROFESSIONAL EXPERIENCE

Modern Technology

JAN 2025 – PRESENT

Software Developer | QA Tester

Atlanta, GA

- Built and enhanced client-facing workflow applications using JavaScript, React, Google Apps Script, Sheets, Drive, Firebase, and Google Cloud.
- Translated stakeholder requirements and product feedback into working features, then demonstrated releases and corrected permission, synchronization, and deployment issues.
- Initiated digital workflow improvements for electronic signatures, file uploads, email routing, PDF generation, status tracking, and centralized records.
- Executed functional, regression, and user acceptance testing; reproduced defects, documented evidence, coordinated corrections, and verified fixes before release.
- Validated workflows covering 5+ employee form types and a five-stage approval process, including role-based access, notifications, file handling, PDF output, and archives.

Georgia Southern University

JAN 2024 – DEC 2025

IT Lab Assistant

Statesboro, GA

- Diagnosed Tier 1 hardware, software, authentication, printing, and connectivity incidents for students and faculty.
- Maintained lab availability through endpoint health checks, device imaging, system configuration, print-server troubleshooting, and incident documentation.
- Guided users through MFA enrollment, password recovery, SSO access, and protected-print permissions.

Georgia Southern University

JAN 2022 – AUG 2025

IT Helpdesk Assistant

Statesboro, GA

- Handled an average of 25 support requests per day involving account access, devices, software, printers, classroom technology, and service outages.
- Provisioned accounts and equipment, imaged and patched endpoints, performed vulnerability scans, and improved internal knowledge-base content.

SELECTED PROJECTS

Caring Hands Application & HR Portal – Built and tested an online job application and onboarding portal that replaces a 41-page paper packet: emailed-code sign-in, saved drafts, policy acknowledgments, an onboarding dashboard, and a Google sign-in HR portal with hiring approvals and an activity log.

Caring Hands Employee Forms Portal – Developed and tested digital employee forms with drawn signatures, file uploads, RN routing, PDF output, email notifications, and organized Drive records.

RCCG Fund Request & Approval Center – Built and tested a role-based five-stage church fund workflow with HOD, admin, and finance approvals, receipt capture, audit history, final PDFs, and archives.

FarmPulse Farm Management Platform – Built a farm-management application for fields, crop seasons, activities, expenses, livestock, yield tracking, analytics, authentication, and cloud data workflows.

Attack & Detection Lab – Created an isolated Kali Linux, Windows 11, and Ubuntu lab; ran authorized reconnaissance and credential-attack scenarios, then analyzed traffic and alerts with Nmap, Wireshark, Snort, Suricata, and Splunk.

EDUCATION & DEVELOPMENT

Bachelor of Science in Information Technology | Georgia Southern University | December 2025

Professional Development: AWS Cloud Fundamentals | AWS Solutions Architect coursework in progress
